

NETSTOCK

Reduce excess inventory.
Release working capital.
Minimise stock-outs.

NETSTOCK is an affordable cloud solution that helps companies reduce excess inventory and free up working capital while minimising stock-outs and increasing revenue.

It is designed to integrate with ERP systems to provide visibility of inventory levels and investment, produce quality forecasts and optimal replenishment recommendations.

Visual dashboards display overall inventory performance and provide early warning of items needing attention.

NETSTOCK is easy to use, quick to adopt and can be accessed anytime, anywhere via web browser or mobile device.

Benefits

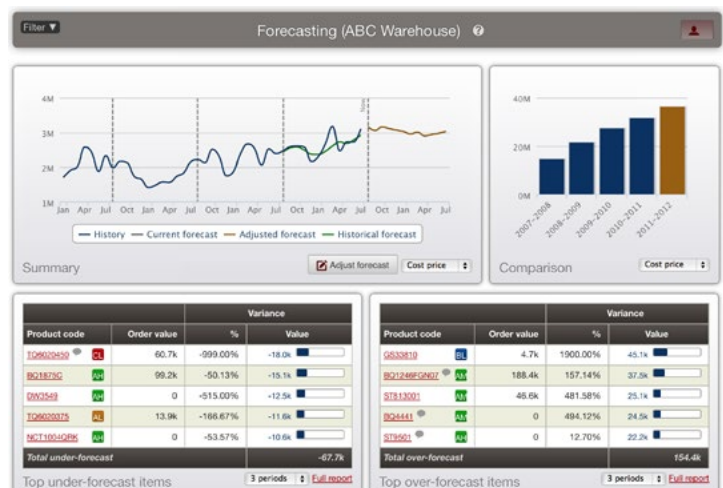

- Reduce inventory by 10%-25%, reduce working capital and improve cash flow.
- Improve fill rates by 2%-10%, minimise stockouts and increase sales.
- Significantly reduce the time spent on planning, forecasting and ordering.
- Better inventory visibility, including early warning of items needing attention.
- The right inventory in the right place at the right time, helping you to grow your business.

“In the first six months, we saw a 14% increase in inventory availability combined with a 38% increase in sales. NETSTOCK is a highly valued solution that gives our business a competitive edge.”

Steven Cumper, Director and Co-Founder – Medshop Australia (Medical Supplies)

Track performance and identify problem items through interactive dashboards with drill down features

Utilises the latest forecast technology to generate item forecasts while facilitating manual overrides

Fast to Implement and Cost-Effective

A cloud solution, NETSTOCK can be implemented in days and is accessible anytime, anywhere.

- No local server installation, providing worry-free updates and maintenance.
- No additional hardware or software to purchase.
- Delivers rapid deployment and scalability.
- No licence fees, no yearly maintenance fees and no cost to upgrade.
- A once-off cost to implement and a monthly subscription fee with no minimum term.
- Allows for easy adoption with minimal risk.
- Secure data transfers and secure web interface with banking-strength encryption.

Features

User Interface - Easy-to-use web and mobile interface with contextual information display for clarity.

Dashboard - Tracks and displays key inventory performance metrics. Provides stock value, excess and potential excess; availability, stock-outs and potential stock-outs. Allows drilldown to item details.

Forecasting - Sophisticated forecast engine generates item forecasts incorporating seasonality and trends, with graphical user interface for refinement.

Inventory Monitoring - Provides early warning of stock-outs, potential stock-outs, surplus orders and poorly performing forecasts.

Interactive Reports - Provides critical and detailed information to optimise inventory.

Ordering Schedule - Shows what items to order and when to order them to ensure an optimal inventory level.

Classification Matrix - A unique classification matrix that highlights your most important items, so you can focus on the items that make a significant difference in your business.

Order Management - Visibility of existing orders. Exceptions lists that highlight where there is currently too much on order or not enough on order.

Supplier Performance - Monitors and displays actual supplier delivery performance.

Item Data - Provides a single view of all item information, in one place.
